

# How to Add the Trust Point Website to Your Home Screen on an Apple Device

1. Open the Safari application on the home screen of your iPhone or iPad. Navigate to the Trust Point website at [www.trustpointinc.com](http://www.trustpointinc.com).

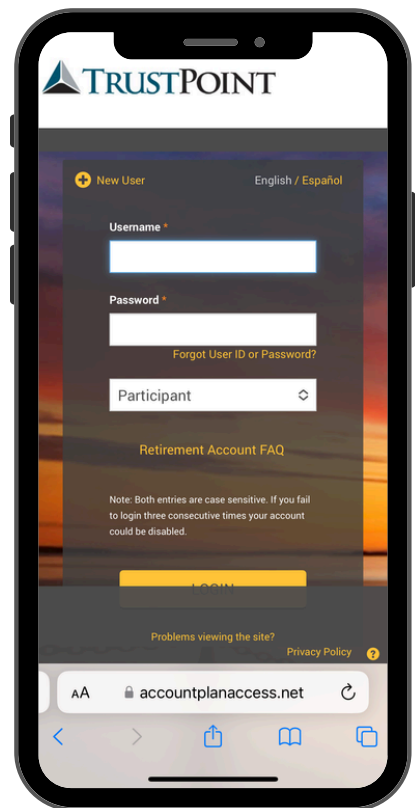

2. Once you are on the Trust Point website, click on the blue button at the top that says “Click Here to Select Your Login.”

3. You will be directed to the Login page. When you get to this page, scroll down until you get to the “401(K) PLAN - EMPLOYEES LOGIN” button (as shown below), and select it.

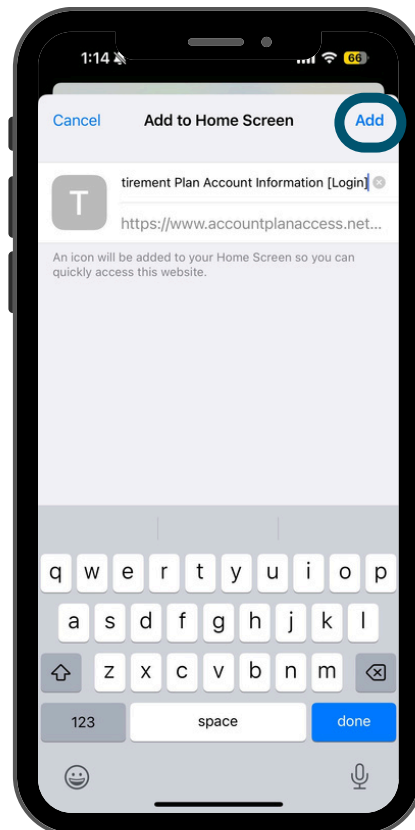

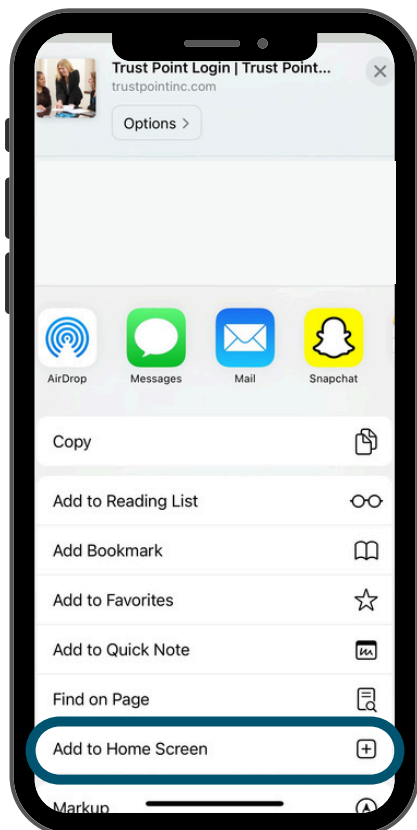

4. The Trust Point Retirement Account Portal Login Page will come up.

5. To save this page to your home screen, click on the “Share” icon (shown below). This will bring up the share options that your Apple product offers.

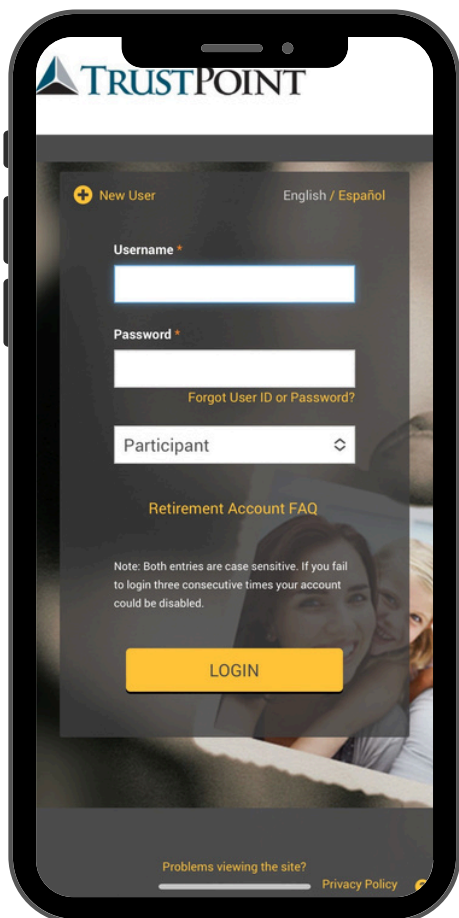

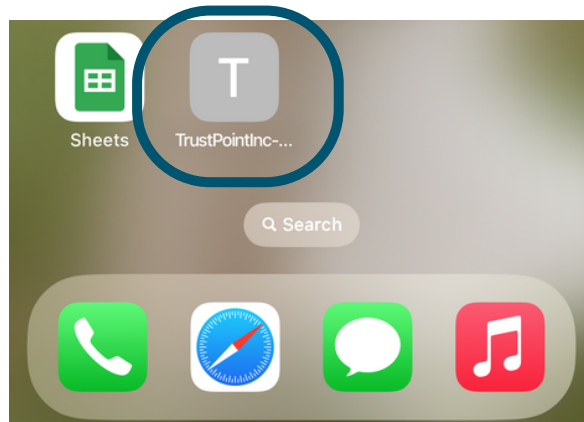

6. Scroll down the list of options, then tap “Add to Home Screen.” Proceed to click “Add” on the next screen. If you do not see “Add to Home Screen”, you can edit your list by scrolling to the bottom, tap “Edit Actions”, then tap the Plus icon to add the bookmarked page to your home screen.

7. Go back to your home screen to find the application with the bookmarked page. It will be called “Trust Point Inc - Retirement Plan Account Information.”

8. Enter your existing Username and Password to log into your account.
